Independence Reer Side During the past week we have traveled quite extensively through the southern portion of Folk and the horth and of Benton counties, and we have never seen a more flattering prospect for heavy crops of hay and grain than the localities visuted present at the present time. The fall sown wheat and oats present, perhaps, almost too great a growth of straw, but where the grain has headed out, and that is the case with most of it, the heads are extremely large and plump and hid fair to yield an immense crop. The acreege sown is larger than eyer before, much of the oak grab land in the Luckiamute and Soap creek hills have ling been cleared and sown during the past winter, and this wheat bids fair to pay with the crop of this year for all the expense of grubbing, sowing, etc. From present indications the farmers of the Willamette valley will have a greater surplus of grain for shipment then expense.
